Phase 3: Program Set-up

Contents

- I. [Enrolling Administrators](#)
- II. [Enrolling Residents](#)
- III. [Enrolling Care Providers](#)
- IV. [Creating Behavior Scales](#)
- V. [Performing Analysis on Behavior Intervention Effectiveness](#)
- VI. [Performing Analysis on Resident PRNs](#)
- VII. [Performing Analysis of Care Provider Activity](#)

I. Enroll Administrators:

* Have each person that will have administrative access for your facility enroll themselves as New Administrators by following these directions:

1. Login as an administrator
2. Under Scale Enrollment on left column **Click** on Enroll New Administrator
3. Complete First and Last name, then choose your target population (Dementia/Alzheimer's Disease), and then create an individualized 4-character login.
4. Click Submit new Administrator personal data. (See Figure 1)

[Back to Table of Contents](#)

New Administrator Data Form (*required)

Name

First*

Last*

Select ABAIT Scale Target Population*

Create Administrator Login ID

Enter Login ID*

Re-enter Login ID*

Figure 1

II. Enroll Residents:

1. Under Scale Enrollment on left column **Click** on Enroll New Resident
2. Complete form for each resident to be enrolled in ABAIT Program and Submit

III. Enroll Care Providers:

1. Under Scale Enrollment on left column **Click** on Enroll New Care Providers
2. Complete form for each Care Provider using the first two digits of first and last name as login and Submit.

IV. Encourage Use of Education Module and recording Unscaled Behavior Episodes for Care Providers and other staff

[Back to Table of Contents](#)

IV. Create Scales

1. Under Scale Creation and Maintenance on the left column **Click** on Create and Review Resident's Behavior Scales.
2. Look for the Resident with an empty button under one of the four categories: Anxiety, Resistance to Care, Vocalization, and Aggression. This empty button suggests behavior episodes have been recorded for this resident in that category. **Click** on the button and **Click** Submit.
 - a. (See Figure 2 below: Follow Grace W to vocalization column and note an empty button.)

Select Resident's Map to Create Tap for more Info

Red Indicates Unscaled Behavior recorded after Scale Creation

First Name	Last Name	Birth Date	Anxiety	Resistance to Care	Vocalization	Aggression
A	P		No Behavior Data	No Behavior Data	No Behavior Data	No Behavior Data
Grace	W	1931-03-01	<input type="radio"/> Created 2016-10-02	<input type="radio"/> Created 2015-06-19	<input type="radio"/>	No Behavior Data

Submit Resident for Scale Review

Figure 2

3. Observe the triggers noted by staff. Group these triggers if possible then type a Trigger in Trigger 1 box. Next look at Interventions for this trigger recorded by staff. Create an individualized intervention based on this information then **Click** the Intervention 1-1 box and look for similar intervention in the Intervention list. If your individualized intervention does not already exist, **Click** New Intervention and type intervention in the box provided.
4. Follow the steps above for each new trigger type; remember to group when there are similarities between triggers. (See Figures 3 & 4 below)

[Back to Table of Contents](#)

Table Displays All Recorded Vocalization Related Episodes to Date Tap for more Info

Red Data Indicates Unscaled Behavior Recorded After Most Recent Scale Creation ()

Event Date Time Duration(min)	Trigger	Behavior Type	Behavior Description	Intensity	Most Effective Intervention	Intervention to Avoid	PRN
2010-10-18 24:15:00 (20)	physical pain	Vocalization	Fell off chair, hurt knee	Louder than conversational, mildly disruptive, still redirectable (3)	distraction	none	No
2010-11-05 23:30:00 (15)	take food tray	Vocalization	began moaning when food tray taken	Louder than conversational, mildly disruptive, still redirectable (3)	lead out of cafeteria	none	No
2011-12-13 18:30:00 (45)	Did not like food	Vocalization	Would not eat	Extremely loud, screaming, highly disruptive, unable to redirect (5)	Take Time	none	No
2016-09-01 16:30:00 (25)	people are leaving	Vocalization	Wants to talk to daughter	Loud, disruptive, difficult to redirect (4)	take to room to see pictures of daughter	saying no	Yes

Figure 3

Enter Vocalization Data Below to Create Grace W's Behavior Scale

Enter **Trigger Names** then Choose **Interventions** listed in order of historical effectiveness or select **New Intervention** and enter single key words and/or short phrases as descriptors in the green "New Intervention" drop down textboxes.

Trigger 1	Trigger 2	Trigger 3	Trigger 4
Intervention 1-1	Intervention 1-2	Intervention 1-3	Intervention 1-4
Intervention 2-1	Intervention 2-2	Intervention 2-3	Intervention 2-4
Intervention 3-1	Intervention 3-2	Intervention 3-3	Intervention 3-4
Intervention 4-1	Intervention 4-2	Intervention 4-3	Intervention 4-4
Intervention 5-1	Intervention 5-2	Intervention 5-3	Intervention 5-4
Intervention 6-1	Intervention 6-2	Intervention 6-3	Intervention 6-4

Submit Behavior Scale

Figure 4

- Once you have created individualized interventions for each trigger, continue filling in the rest of the open interventions by using your own knowledge of this type of trigger or use the suggestions in the drop down list.
- Click** Submit after table is complete

[Back to Table of Contents](#)

V. Performing analysis on behavior intervention effectiveness.

1. To enter the analysis features, select either “Resident Episode Historical Review” or “Global Analysis”. See red arrow, Figure 5.

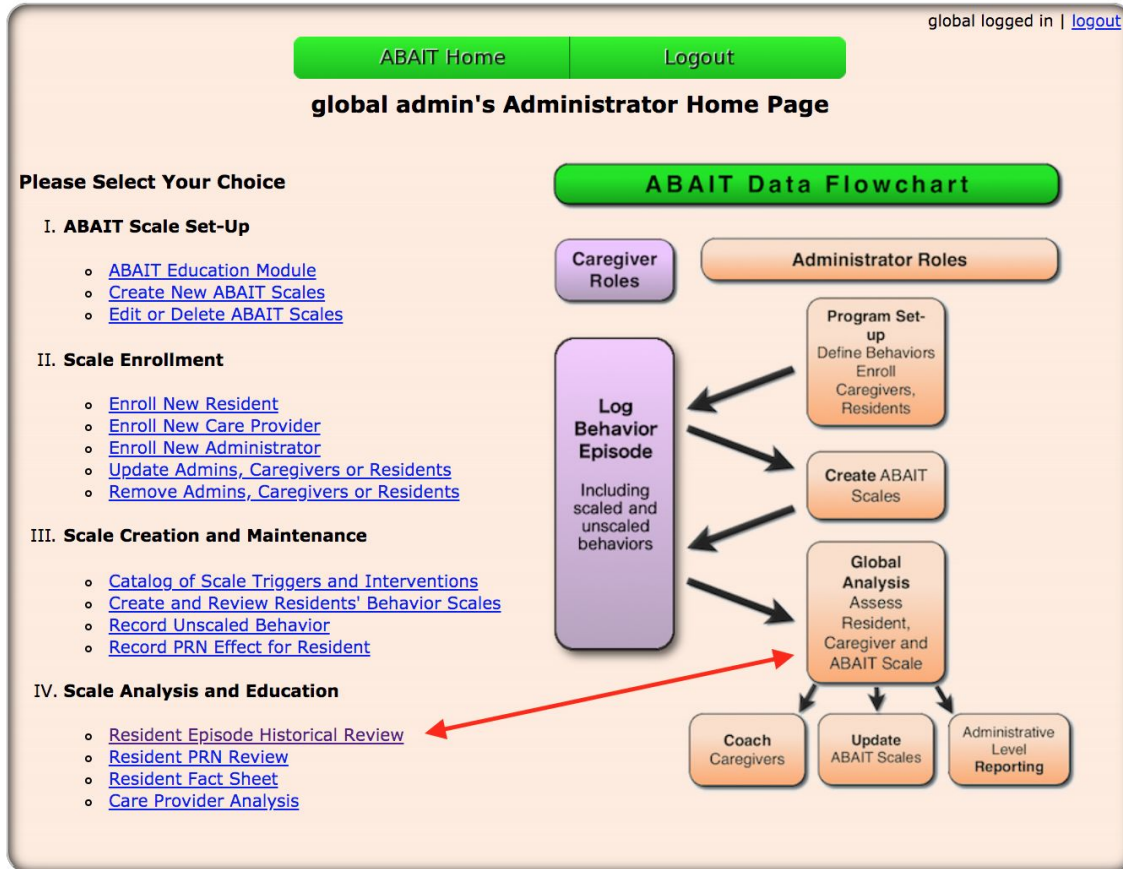

Figure 5

2. Select either target resident, or “All Resident Summary”.
3. Select time interval over which analysis is to be displayed.
4. Select “Behavior/Scale” or “All Behavior Scales”.
5. Select type of analysis to be performed
 - a. NOTE: Figure 6 shows “All Resident Summary”, “3 Months”, “All Behavior Scales”, “Behavior Scale Totals” selected.
6. Submit the analysis form

Submit Selection for Analysis

Figure 12

[Back to Table of Contents](#)

4. Submit Selection for Analysis.
5. If “All Care Provider Summary” was selected, observe provider list and number of interventions recorded.
6. From the list of providers, if all providers were selected, select one care provider of interest to further examine care provider interactions.
7. Note display for the selected care provider, broken down by (Figure 13);
 - a. “Episode List”
 - b. “Trigger and Intervention Analysis”
 - c. “Episode per Time of Day”
 - d. “Scale Totals”
8. Interactive options for the display are:
 - a. Select “tap for more info” buttons for further explanation of analysis.
 - b. Print the display.
 - c. Graphically display analysis values.
 - d. Return to the Care Provider List, for further analysis.

Episode List for Residents of L A during interval: 1992-09-09 - 2020-01-26[Return to Provider List](#)

Resident	Date	Time of Day	Behavior Classification	Trigger	Episode Duration	PRN Given
MU 01	2017-10-14	16:22:00	Vocalizations	after shower	15	None
LyYn 03	2017-10-14	17:00:00	Vocalizations	emotional need	5	None
LyYn 03	2017-10-24	20:00:00	Vocalizations	emotional need	60	None

Trigger and Intervetion Analysis

Anxiety Behavior Episodes				
----Trigger----	Number of Episodes	Duration of Episodes	Most Effective Intervention	Graph
inability to communicate	0	0		No Interventions Logged
